

Post Implementation Evaluation Report

Mainframe z9 to z114 Processor Replacement Project – Information Technology Services, Office of

Project Dates: 10/2012 through 1/2013

Project Cost: \$831,042

Project Objectives:

This project replaced the old z9 mainframe processor with a new z114 processor. The old z9 processor was in place over four years. Typically, processors are replaced or upgraded every three or four years to stay compliant with service life, maintenance contracts, etc. The mainframe processor provides mainframe computing capacity for numerous agencies in the state including the Departments of Revenue, Children and Families, Transportation, Labor, and Administration.
