

## **Post Implementation Evaluation Report**

### **Kansas Truck Routing & Intelligent Permitting System (KTRIPS) – Kansas Department of Transportation (KDOT)**

Project Dates: 2/2010 through 5/2014

Project Cost: \$1,573,904

In 2007, a report (Vertical Bridge Clearance Data Process; Report No. 3 – Project Recommendations; 9/25/07) was commissioned to evaluate the current permitting system and determine the strengths, weaknesses, and future steps to better serve customers. The results of the report recommended an upgraded permit application site. Specific recommendations included a "self service, Internet-based, auto-routing environment," "an advanced, graphical, mapped-based interface," and "real time access to oversize/overweight permitting, routing and incident data". Once the report was finalized, the state of Kansas approached the trucking community with a proposed increase on specific permits to help fund upgrades and advancements like the proposed K-TRIPS and other future technology advancements. The proposed system will provide those features and more while also allowing the permit process to be more automated.
