

## **Post Implementation Evaluation Report**

### **Mobile Data Unit Expansion Project – Kansas Highway Patrol**

Project Dates: 8/2009 through 7/2010

Project Cost: \$1,005,141

#### Project Objectives:

The objective of the Mobile Data Unit (MDU) Expansion Project was to acquire the hardware, software and installation services to provide Kansas Highway Patrol (KHP) officers in the north-central and western regions of the state roadside connectivity via aircard. The agency met this objective by installing Dell laptop computers in law enforcement vehicles and establishing a mobile virtual private network (VPN) utilizing NetMotion Wireless Mobility XE and built-in Verizon aircards.
