

Post Implementation Evaluation Report

Mobile Data Unit Replacement (East Region) Project – Kansas Highway Patrol

Project Dates: 2/2010 through 10/2010

Project Cost: \$856,350

Project Objectives:

The objective of the Mobile Data Unit (MDU) Replacement Project was to acquire the hardware, software and installation services to provide Kansas Highway Patrol (KHP) officers in the south-central and eastern regions of the state roadside connectivity via aircard. The agency met this objective by installing Dell laptop computers in law enforcement vehicles and establishing a mobile Virtual Private Network (VPN) utilizing NetMotion Wireless Mobility XE and built-in Verizon aircards.
