

Post Implementation Evaluation Report

University of Kansas Medical Center – SciQuest

Project Dates: 4/2013 through 1/2014

Project Cost: \$2,565,110

This project improved the purchasing process for the University of Kansas Medical Center (KUMC) and Research Institute. It provided:

- An intuitive shopping environment for goods and services that is similar to the eCommerce websites that are used on the Internet today.
- Data to accurately identify targets for improved contracted pricing
- Improved leverage as KUMC negotiates with suppliers
- An eShopping environment that puts supplier catalogs at the shopper's fingertips.
