Post Implementation Evaluation Report

Regents, Kansas Board of (KBOR) – Business Intelligence Software/Tools

Project Dates: 1/2012 through 11/2013

Project Cost: $656,818

The business intelligence tool ensures ease of access, uniformity of coding structures, automated report delivery, allows institutional query, and provides interactive and drill down capabilities which, in turn, provides transparent standard and ad hoc reporting and allow KBOR staff and institutional personnel to concentrate on research. In 2009, Kansas Board of Regents, in collaboration with the Kansas State Department of Education, submitted a grant proposal under the Statewide Longitudinal Data System American Recovery and Reinvestment Act (SLDS ARRA). Included in this proposal was a Business Intelligence model that would alleviate the reporting burden for KBOR and for Kansas postsecondary institutions. The grant was awarded and funding was made available for the purchase and implementation of a tool to uphold the model.
