Post Implementation Evaluation Report

K-LISS Architecture Subproject VII – Avamar Grid Backup and Disaster Recovery Solution - Legislature

Project Dates: 8/2009 through 4/2010
Project Cost: $257,840

<u>Project Objectives:</u>
1. Secure and reliable backups of all legislative data and systems, including user files, application data, Exchange Server 2007 and the new KLISS application development environment.
2. Identify and implement a backup and disaster recovery solution that would meet the Legislative Strategic Plan goal of 99.999% uptime for the KLISS application.
3. Reduce system administration hours required to perform and maintain legislative backups.
4. Implement the Avamar Grid Backup System within the reduced legislative budget for information technology.
