

## **Post Implementation Evaluation Report**

### **Information Technology Services – State Defense Building Fiber Project**

Project Dates: 7/2015 through 8/2016

Project Cost: \$1,184,380

The State Defense Building Fiber Project ran two redundant paths of fiber optic cable to the State Defense Building on Topeka Boulevard, which was to be a new data center and State employee location. The infrastructure included services from established contract vendors to perform the task of boring and trenching to lay conduit for pulling fiber underground to the State Defense Building, and various agency locations along the two paths.
